Hot X: Algebra Exposed!

Synopsis

"Dancing With The Stars" contestant Danica McKellar's (Math Doesn't Suck, Kiss My Math, Girls Get Curves) New York Times bestseller tackles the most feared of all math classes: Algebra! Algebra: The word alone has been known to strike fear in the hearts of even the best students, but help is here! With her two earlier books, actress and math genius Danica McKellar shattered the "math nerd" stereotype and empowered girls to conquer middle-school math and pre-algebra. Sizzling with McKellar's trademark sass and style, Hot X: Algebra Exposed now shows high schoolers how to master algebra topics like square roots, polynomials, quadratic equations, word problems, and more. In addition to fun extras like personality quizzes, reader polls, and boy-crazy confessionals, Hot X include time-saving tips and trick sample problems with detailed solutions and relatable real-world examples. Parents and daughters alike will cheer McKellar as they watch their test scores rise!

Book Information

Paperback: 432 pages

Publisher: Plume; Reprint edition (June 28, 2011)

Language: English

ISBN-10: 0452297192

ISBN-13: 978-0452297197

Product Dimensions: 5.9 x 0.9 x 9 inches

Customer Reviews

Another gem from Danica. Like her first two books (Math Doesn't Suck: How to Survive Middle School Math Without Losing Your Mind or Breaking a Nail and Kiss My Math: Showing Pre-Algebra Who's Boss), Hot X: Algebra Exposed is more than a math book. It contains additional information which enlightens, provides direction, and builds self-esteem in girls and young ladies. Boys should also use it -- just skip the chick stuff and go for the math. At last, a book that teaches middle-school students and their parents in simple terms how to solve quadratic equations by completing the

square and to solve the quadratic equation in standard form in X ($ax^2 + bx + c = 0$) to come up with the quadratic formula. Most colleges and high schools do not teach this -- they just expect the student to know it. The charter school I support plans to use Hot X: Algebra Exposed in concert with the first two books to ensure most or all Grade 8 students attain an A (93 or higher) in Algebra I. Danica McKellar needs to continue writing math books. Since these are such outstanding books, few state departments of education will adopt them for use, which means parents, other major caregivers, and supportive businesses will have to come up with the funds to help schools with the purchase of these books.
